

**STEP 1 Add a vehicle**

Ensure the vehicle has been added in the Titan GPS Logbooks portal with the Device Type "Geometris". Please contact your administrator if the vehicle has not been added.

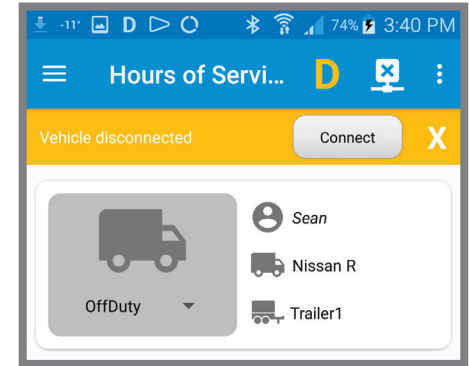

**STEP 2 Log into the App**

Log into the App and tap the small truck icon below the name and select the correct vehicle in the "Switch Equipment" dropdown.

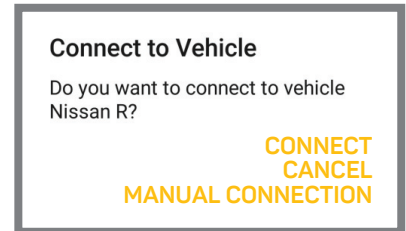

**STEP 3 Pair the device**

Ensure the device has been plugged into the diagnostic port for 10 seconds. Then tap the "Connect" button at the top to begin pairing to the device.

**STEP 4 Manual Connection**

When it says connect to a vehicle, choose "Manual Connection".

**STEP 5 Log into the App**

Choose the "Geometris" option and tap "Next" to establish connection.
